PROFILE SUMMARY

Following an enjoyable career in transport and mechanical services, I now have the opportunity to pursue my interest in software development by completing my qualification this year. I believe my ranging knowledge and experience can further add to the success of any workplace I become a part of. I am trained in both front-end and back-end design and enjoy implementing software solutions across the complete development lifecycle of a product.

PostgreSQL

EDUCATION

Diploma of IT – Web Development Coder Academy	2022
Certificate III in AutoElectrical Technology Work Skills	2021
Certificate III in HV Mech Technology Work Skills	2020
Certificate II in Automotive AC Technology Work Skills	2020

PROJECTS

Dentist Online Booking Application

Front – end : <https://github.com/HardeepSinghAu/pink-sunrise-dentistry>

Back – end : <https://github.com/LeithPrice/pink-sunrise-dentistry-api>

Deployed site : <https://pink-sunrise-dentistry.netlify.app>

- A final team project for my Diploma, we created a website for a fictional dentistry that allowed automatic online bookings to be made and managed without staff involvement.
- Features involved user registration with 24 hr session security using JWT and a booking feature that allowed you to query a specific doctor and date availability in realtime. This would allow you to select from the available appointment times on the date selected and confirm an appointment. This new booking would immediately reflect in the users appointment history, plus the available time would no longer be available for booking by any logged-in user.
- Third party email services were integrated both front and back end for booking confirmations and contact enquiries.
- Created using React front-end and Rails back-end with a PostgreSQL database.

Revonate Rails App

Deployed site : <https://revonate.herokuapp.com>

Repository : https://github.com/LeithPrice/Revonate_Rails_App

- A prototype two-sided marketplace in which users can buy and sell project cars that require repair.
 - Features include account set up and authentication using Devise ruby gem, listing uploads including photos and buy / sell history. Authorisation protocols are also in place for restricted CRUD actions.
 - Created in Ruby on Rails with a PostgreSQL database and deployed using Heroku.
-

WORK EXPERIENCE

Mechanic – Auto Electrician / Self Employed

July, 2019 – Current

Maxwell Tyre and Mechanical, Griffin QLD

- Self employed, running a mechanical and auto electrical business.
- Diagnose complex mechanical issues through testing and troubleshooting.
